

Rami Nawahda

Full Stack Engineer

Ramallah, Palestine | rami.nawahda@gmail.com | (+970) 597306351 | github.com/raminawahda7 | linkedin.com/in/rami-nawahda

SUMMARY

Full-stack engineer with 5+ years building and shipping production software end-to-end. Strong across Angular / TypeScript frontends and NestJS, .NET, and Node.js backends, with PostgreSQL schema design and deployment. Recently building an AI-powered healthcare analytics platform with Python and FastAPI, and wiring AI into real product surfaces. Focused on quality, correctness, and data integrity, backed by automated testing with Playwright and TestCafe.

WORK EXPERIENCE

Team Lead & Full Stack Engineer <i>Kayan Healthcare Technologies · Jenin, Palestine (Remote)</i> - Leading development of an AI-powered healthcare analytics platform using Python, FastAPI, and React. - Built data processing and analytics pipelines using pandas and NumPy for healthcare data analysis. - Set up and deployed the platform on on-premise servers, owning infrastructure and reliability. - Designed PostgreSQL schemas with a focus on data integrity, optimization, and migrations. - Led a distributed remote team — code reviews, mentoring, and engineering best practices.	Jan 2024 – Present
Full-Stack Developer <i>American Psychological Association (APA) · USA (Remote)</i> - Built three production systems: election management, commenting, and data synchronization. - Developing full-stack apps with Angular 20, NestJS, and TypeScript, owning features end-to-end. - Built AWS Lambda functions for automated data sync and multi-step workflow orchestration. - Applied AI tooling professionally across the delivery workflow to ship high-quality production features faster, without compromising correctness or data integrity. - Designed automated UI and integration test suites; deployed via CI/CD to AWS.	Apr 2024 – Present
Full Stack Developer <i>AppiaTech Software Services (AerData / Boeing) · Ramallah, Palestine</i> - Designed end-to-end enterprise features using .NET Core, Angular, React, and Node.js. - Set up automated UI testing with TestCafe for large projects built on Kendo UI. - Built modular Angular / React components with NgRx state management. - Mentored junior developers and established engineering best practices.	Apr 2021 – Mar 2025
Front End Developer (Part Time) <i>Mohlel · Riyadh, Saudi Arabia (Remote)</i> - Developed production React / Angular components with Tailwind CSS. - Implemented client-side state management with NgRx signals. - Built reusable UI components with PrimeNG and E-Charts for data visualization.	Oct 2024 – Jun 2025

SKILLS

Frontend	Angular, TypeScript, React, Tailwind CSS, component systems, state management
Backend	C# / .NET Core, Node.js, NestJS, Express, Python, FastAPI, REST APIs
Data	PostgreSQL, MySQL, pandas, NumPy, data pipelines
Testing	Playwright, TestCafe, Jest, Karma/Jasmine — unit, integration, E2E
Cloud / DevOps	AWS (Lambda), on-premise servers, Docker, CI/CD, Git

EDUCATION

B.S. in Computer System Engineering <i>Palestine Polytechnic University · Hebron, Palestine</i>	Sep 2016 – Sep 2020
Full Stack Engineering Internship (PLUS Program) <i>RBK + Anera · Ramallah, Palestine</i>	Dec 2020 – Mar 2021

- Intensive Hack Reactor partner program producing market-ready full stack engineers.
