

# Rami Nawahda

FULL STACK ENGINEER

Ramallah, Palestine

☎ (+970) 597306351 | ✉ rami.nawahda@gmail.com | 📷 raminawahda7 | 🌐 rami-nawahda

“Be the change that you want to see in the world.”

## Summary

Full Stack Engineer with 5+ years of experience building and scaling production applications end-to-end. Strong across React, Angular, TypeScript, Python, FastAPI, Node.js, and .NET, with hands-on experience building AI-powered healthcare analytics platforms and data processing pipelines. Experienced in owning features from frontend and API design through PostgreSQL, testing, deployment, and infrastructure. Strong background in AWS serverless workflows, Docker, CI/CD, and on-premise environments, with a focus on reliability, data integrity, and scalable engineering practices.

## Work Experience

### American Psychological Association (APA)

USA (Remotely)

FULL-STACK DEVELOPER

April. 2024 - Present

- Built three production systems over the past year: an election management system, a commenting system, and a data synchronization system.
- Developing full-stack applications using Angular 20, NestJS, and TypeScript with end-to-end feature ownership.
- Designed and built AWS Lambda functions running automatically for data synchronization and multi-step workflow orchestration.
- Implemented serverless architecture handling long-running and asynchronous processes with proper retry and error handling.
- Built comprehensive automation and unit tests to ensure code quality and prevent regressions.
- Designed PostgreSQL schemas, managed migrations, and optimized database performance for production systems.
- Deployed and maintained services in AWS using CI/CD pipelines.
- Collaborated with Product Owners to translate requirements into reliable technical solutions.
- Manage Azure Boards, creating and refining tasks and leading sprint refinement meetings, translating business requirements into actionable technical tasks.
- Integrated Claude to automatically detect and fix bugs, and built custom Claude skills to streamline the team’s development workflow.

### Kayan Healthcare Technologies

Jenin - West Bank (Remotely)

TEAM LEAD & FULL STACK ENGINEER

Jan. 2024 - Aug. 2026

- Leading development of an AI-powered healthcare analytics platform using Python and FastAPI for backend services and React for the frontend.
- Built REST APIs with FastAPI following clean architecture principles, with proper error handling and separation of concerns.
- Built responsive React components and dashboards to visualize healthcare analytics output for end users.
- Built data processing and analytics pipelines using pandas, NumPy, and other Python scientific libraries.
- Designed and implemented PostgreSQL schemas with focus on data integrity, optimization, and migrations.
- Set up and administered multiple on-premise servers, deploying the platform infrastructure with Grafana monitoring for logs and system health.
- Configured Nginx as reverse proxy and load balancer across multi-server deployments, and set up OpenSSL/TLS certificates for secure integration with partner companies.
- Built and managed Docker images for containerized deployment across the platform’s services.
- Led a distributed remote team, conducting code reviews, mentoring developers, and establishing engineering best practices; managed workflow and requirement tracking using Azure DevOps.

### Mohlel/STOQA

Saudi Arabia - Riyadh (Remotely)

FRONT END DEVELOPER - PART TIME

Oct. 2024 - Jun. 2025

- Developing production React and Angular components using TypeScript and modern component systems.
- Building responsive UI with Tailwind CSS, CSS Grid, and Flexbox for cross-device compatibility.
- Implementing client-side state management with NgRx signals and data fetching patterns.
- Building custom reusable UI components with PrimeNG and E-Charts for data visualization.

- Designed and implemented end-to-end features for enterprise applications using .NET Core, Angular, React, and Node.js following microservices and clean architecture principles.
- Owned features from frontend components through REST API design and PostgreSQL database implementation.
- Built modular Angular components with TypeScript, state management NgRx, and client-side data fetching.
- Developed robust backend APIs with proper error handling, validation, and data integrity.
- Implemented comprehensive testing including unit, integration, and end-to-end tests.
- Deployed applications using CI/CD pipelines and mentored junior developers, establishing engineering best practices.
- Managed project tasks and sprint planning using Jira, translating business requirements into technical tasks for the development team.

Skills

|                    |                                                                                                                                                  |
|--------------------|--------------------------------------------------------------------------------------------------------------------------------------------------|
| Frontend           | React, TypeScript, Angular 20, Tailwind CSS, Component systems, Client-side state management, Data fetching.                                     |
| Backend            | Python, FastAPI, Node.js, Express, NestJS, .NET Core, REST API, Clean architecture.                                                              |
| Data & Analytics   | pandas, NumPy, Python scientific libraries, Data processing pipelines.                                                                           |
| Databases          | PostgreSQL (schema design, migrations, optimization), MySQL.                                                                                     |
| Workflows & Async  | AWS Lambda automation, Serverless workflows, Async processing, Multi-step orchestration, Retry & timeout handling.                               |
| Testing            | Playwright, Jest, Karma, Jasmine, Unit, Integration & End-to-end testing, Test automation.                                                       |
| Agile & AI Tooling | Azure Boards, Jira, Sprint refinement, Requirements translation, Claude Code automation (custom skills, automated bug fixing).                   |
| Cloud & DevOps     | AWS (Lambda, deployment), On-premise server setup, Docker, CI/CD, Git/GitHub.                                                                    |
| Infra & Security   | Linux/Unix administration, Nginx (reverse proxy, load balancing), OpenSSL, TLS/HTTPS, On-premise server setup, Grafana monitoring, Azure DevOps. |
| Languages          | Arabic (native), English (fluent).                                                                                                               |

Education

Palestine Polytechnic University

Hebron - West Bank - Palestine

B.S. IN COMPUTER SYSTEM ENGINEERING

Sep. 2016 - Sep. 2020

RBK + Anera

Ramallah - West Bank - Palestine

PLUS PROGRAM - FULL STACK ENGINEERING INTERNSHIP

Dec. 2020 - March. 2021

- Intensive Hack Reactor partner program producing market-ready full stack engineers with strong problem-solving skills.

Extracurricular Activity

IEEE

Palestine Polytechnic University

MEMBER

Sep. 2018 - July. 2020

- Active member participating in industry events and technical seminars.
